PUMPS

50% Off

Aquascapes Ultra Pumps-Submersible

Ultra-magnetically driven or Mag Drive pond pumps are the ideal solution for use in decorative water features such as decorative stone, spitters or brass. These pumps are very energy efficient, using 50% less power than conventional pumps. They are designed to be operated fully submerged and can be operated in line.

Features

- Fully submersible and energy efficient
- Powers ornamental fountains and statuary
- Prefilter system built in prevents clogging
- Fish safe, environmentally friendly materials

Ideal for water features

- Easy to use and maintain
- Can be used with or without a fountain head
- Ceramic shaft and bearings increase pump life
- Energy efficient

Item No.	Price	Description

Aquascapes AquaForce Solids Handling Waterfall Pumps

Drop in the pond and let it flow. AquaForce Solids Handling Waterfall Pumps can accomplish what most other pumps only aspire to achieve. The combination of high performance, flow and ease of maintenance make it the ideal choice of discriminating pond owners. They are able to pump solids up to 1/4", making them the ideal pump for use w/ external filters like the UltraK-lean™ Pressure filter.

- Flexible universal hose adaptor-accommodates 1/2" to 1 1/2" tubing
- Ceramic shaft-resists damage caused by fine debris
- Graphite injection molded bearings insures long life
- Comes complete w/ 25' power cord

WINTER TIP—great for keeping a hole open in the ice during the winter.

PRESSURE FILTERS 50% Off

The versatile UltraKlear™ filters can be used above-ground or partially buried in the ground up to the filter inlet fitting. Because they are pressurized, water can be pumped up from the filter to the top of a waterfall. Simple, clean, and out of sight. UltraKlear™ filters are available in three different sizes to fit ponds from 1,000 all the way up to 3,500 gallons effective pond volume. Choose from two different models - with or without UVC light.

Here is how it works: As the pond water enters the UltraKlear™ filter, it is forced into a cyclone action and through a special density foam filter. The large foam surface provides increased filtration and bacteria growth. Because the water is pressurized, the foam can fill with many more beneficial bacteria without becoming blocked. Clean water then moves down the outside of the foam filter into the biomedica at the bottom of the filter container where more beneficial bacteria clean the pollutants. In the UVC models, water passes close to the UV light which makes algae clump together to be trapped by the filter.

Item No.	Price	Description
60024 <i>On Hand—1</i>	\$79.99 <i>SRP \$159.98</i>	1000 GAL UltraKlear Pressurized Pond Filter
